**Latest version:** 1.0

**Last update:** July 2022

**Category:** Productivity

## **Description:**

Keep your to-do and notes handy with Virtual Desk. Virtual desk is literally a virtual desk where you can put sticky notes on it. This app is simple, easy to use, and highly customizable. Make your notes look good not only on paper but also on your device.

Are you tired of to-do lists and task management apps with a pile of complex functionalities? Do you prefer putting sticky notes around your desk but still want to check your wherever you go? Virtual Desk offers you both a realistic experience and the convenience of virtual space.

- Create a sticky note with a tap:  
Creating a note is even more facile and less time-consuming than writing in the actual paper. Type texts and choose the due date - and it is done!
- Have done with your note with a tap:  
Drug your achieved task to a trash bin. You can review your past note in the bin.
- Customize the color of your sticky note:  
Choose from various colors to group your task... or just to make your desk look gorgeous.
- Customize your desk:  
Put your sticky notes in your favorite place on your desk, just like you do on your actual desk. Choose a desk texture of your taste from four options.
- Free:  
This app does not require any paper.
